

COURSE SYLLABUS

1 ECE 8448 - Embedded Systems Architecture

2 Meeting Information

3 credits, 3 contact hours

a. **Section 001:**

Lecture: M1200-1430, **DRSDCK-314**

b. **Section DL1:**

Lecture: M1200-1430, **ONLINE-SYN**

3 Course Instructor(s), TA(s)

a. **Section 001:**

Class Instructor: [Maggie Wang](#)

Office Hours: Monday 1:30 - 2:30 PM in person and on ZOOM 6105193830, or by appt.

TA: None

b. **Section DL1:**

Class Instructor: [Maggie Wang](#)

Office Hours: W 12:30 - 2:00 PM in person and on ZOOM 6105193830, or by appt.

TA: None

4 Textbook

This course does not have a prescribed textbook

- a. **Other Supplemental Materials:**
1. An Embedded Software Primer, by David Simon, Addison-Wesley Professional.
 2. Required readings in the *Software and Hardware References* folder in the Blackboard.

5 Specific Course Information

a. **Catalog Description**

A hands-on course on software and architecture aspects of ARM-based embedded systems. Topics include: embedded processor architecture, software architecture and development, communicating with I/O devices, firmware and operating systems, buses and embedded networks, memory technology and design, and low power design.

b. **Prerequisites:** None; **Co-requisites:** None

c.

6 Learning Objectives

- a.
 - Understand the special requirements that are imposed on embedded systems.
 - Understand the key instruction set architecture (ISA) features of embedded processors, particularly ARM processors.
 - Understand how architectural and implementation decisions influence performance and power consumption.
 - Have the knowledge of special features of programming embedded processors.
 - Write more efficient code for embedded systems.
 - Understand how microprocessors, memory, peripheral components and buses interact in an embedded system.
 - Understand the role of the compiler in the embedded system design process.
 - Understand the properties of real-time operating systems, including real-time scheduling policies.
 - Have improved engineering system design and implementation techniques.
 - Have hands-on experience with industrial standard development software and hardware.
 - Understand key state-of-art issues for embedded systems.

7 List of Covered Topics

1. Please refer to the tentative schedule of topics below.

8 Tentative Schedule

Tentative schedules for all sections follow. Be sure to refer to the schedule for your specific section, if more than one is provided.

Tentative Schedule for All Sections

Week	Date	Topics
1	01/12	Course overview; Introduction to embedded systems
2	01/26	Embedded processor architecture: ARM; Tutorial A: Using ARM processor on DE10-Standard
3	02/02	Hardware platforms of embedded systems; Tutorial C: My first HPS-FPGA
4	02/09	Software architectures for embedded systems
5	02/16	Communicating with & controlling I/O devices
6	02/23	More about embedded software
7	03/02	Spring break, no class
8	03/09	Connectivity: embedded networks
9	03/16	Lab: Tutorial B: Using Linux on DE10-Standard
10	03/23	RTOS1: Firmware & OS for embedded systems
11	03/30	RTOS2: Real-time scheduling policies
12	04/06	Easter Break; no class
13	04/13	RTOS3: Semaphores and ISRs; Tutorial: IRQ with Linux on the DE10 Board
14	04/20	Memory technology; Processor power management; Tutorial D: Using HPS+FPGA+Linux on DE10 Standard
14	04/27	Project presentations
15	05/04	Final Exam
16	05/11	Project report due

9 Grading Policy

- Homework/Lab Assignments – 60%
- Final Exam – 20%
- Project – 20% (Proposal: 5%; Presentation 5%; Report: 10%)

Detailed description and requirements will be posted in the Assignments folder

Letter grade scale: A(94–100), A–(90–93), B+(87–89), B(83–86), B–(78–82), C+(74–77), C(70–73), F(<70)

10 HW Assignment and Laboratory Report Submission Policy

Homework and project assignments will be posted in the Bb **Assignments** folder. Late submissions will be accepted with a 5% loss of the points per late day, unless approved by the instructor in advance. If you are unable to take the exam on the scheduled date, you must contact the instructor before the exam.

Since this is a hands-on course with complex software and hardware, and graduate students tend to come with diverse technical backgrounds, you are expected to learn how to look for appropriate

technical documentation, and read and understand them efficiently in a focused manner for your needs. You are expected to develop troubleshooting and debug skills through vendor's technical documentation and discussion forums when you have questions and problems with the assignments and project.

11 Attendance Policy

General Rules

The full version of the official Villanova class attendance policy is posted at <https://live-villanova-catalog.cleancatalog.io/class-attendance>, but the main points are as follows.

You are expected and assumed to attend class meetings in person if you are enrolled in Section 001, or participate through ZOOM or watch videos if you are in the DL section. You are responsible for all the material covered in class including handouts and class notes.

In-class students should inform the instructor if they plan to be late or absent from class. In all cases, students should be prepared to provide documentation to petition for excused absences to the appropriate Associate Dean. The form for requesting an excused absence can be found here (<http://www1.villanova.edu/villanova/engineering/resources/policies/forms/studentAbsence.html>). Absence from class does not release the student from work assigned. Students who miss an in-class obligation (exam, presentation, etc.) due to an excused absence will not be penalized - the instructor may offer a make-up test, arrange an alternative time for a presentation, exempt a student from the assignment, or provide another arrangement.

Whenever possible, students should inform the instructor if they plan to be late or absent from class. In all cases, documentation is required to petition for *excused* absences to the Associate Dean for Student and Strategic Programs, Dr. Stephen Jones. The excused absence form is posted on this page: <https://villanova.sharepoint.com/teams/COECurrentUndergrads/SitePages/Catalog.aspx> under the heading "Engineering Academic Policies and Forms".

Excused absences do not count towards a failure in the course for first year students. Absence from class does not release the student from assigned work. Students who miss an in-class obligation such as an exam, a presentation, etc., due to an excused absence will not be penalized - the instructor may offer a make-up test, arrange an alternative time for a presentation, exempt a student from the assignment, or provide another arrangement. In the case of illness or injury, the form must be submitted within 24 hours of missing a class. The University's list of excused absences for all students includes the following:

1. Participation in NCAA athletic competitions
2. Participation in special academic events such as: conferences, field trips, project competitions, etc., and in official university business such as student representatives attending meetings related to university governance
3. Attendance at significant events of the immediate family such as: funerals, weddings, etc.
4. Religious holidays - see the University's policy on Religious Holidays
5. College-approved participation in placement activities such as: job interviews, graduate school interviews, job fairs
6. Legally required absence such as: jury duty, court appearance, short-term military service
7. Documented serious illness or disability

Personal Days

Personal Days are NOT allotted for laboratory sessions and courses that meet once a week. For all other courses that meet at least twice a week, students are entitled to excused absences for any reason that may contribute to their personal wellness. The following rules apply.

Students must advise the instructor by email *before* class of their intent to utilize a Personal Day as the reason for their absence. A Personal Day will not be approved retroactively. Students may, but are not required, to provide additional information regarding their absence. A Personal Day does not grant an automatic extension for items due. Students remain responsible for all assignments, exams, presentations, etc. due on that date. The instructor may apply her/his discretion on a case-by-case basis to determine whether an extension on a deliverable item is appropriate.

For classes that meet thrice a week (50 mins \times 3), TWO personal days are allowed in the semester. These personal days may not be used ...

1. on consecutive class days
2. in the same week
3. immediately preceding or following a University holiday or break period, and
4. on days when exams, presentations or other major assignments are scheduled.

For classes that meet twice a week (75 mins \times 2), ONE personal day is allowed in the semester. This personal day may not be used ...

1. immediately preceding or following a University holiday or break period, and
2. on days when exams, presentations or other major assignments are scheduled.

12 Examination Policy

The College of Engineering has adopted the following general examination guidelines:

1. Students must arrive before the start of the examination. Under exceptional circumstances a student may need to arrive late, but he/she can enter the examination room no later than 5 minutes after the start of the exam.
2. All cell phones and smart devices must be turned off and stored away until the student exits the exam room, unless explicitly permitted by the instructor.
3. The official [Villanova class attendance policy](#) must be followed when requesting excuses for absences or lateness to an examination.
4. Each student must write and sign the following statement, "I have neither given nor received any unauthorized assistance in the completion of this examination."
5. In the case of virtual exams, the instructor may implement video proctoring or other measures to ensure academic integrity. For consent purposes, the instructor will announce ahead of time to students if they plan to use any form of video proctoring during an assessment and whether a recording will take place.

13 Academic Integrity Policy

The College of Engineering is committed to creating an environment of academic integrity and ethical decision-making that we hope is reflected in the actions of our students and graduates. As Villanova students, integrity is central to the University mission. As engineers, our code of conduct requires us to place honor and integrity at the forefront of everything we do. As engineering

students, it is expected that you will begin to adopt these values and instill them into your work habits. Students violating the academic integrity policy will receive a zero on that assignment or exam and the violation will be reported to the Associate Dean for Academic Affairs. The University's academic integrity policy can be found on the following web page:
<https://live-villanova-catalog.cleancatalog.io/academic-integrity-0>.

14 Use of Artificial Intelligence

The use of the AI-generated content is NOT permitted for any assignment submission in this course. Its use will result in an academic integrity violation and a zero on the assignment.

15 Adherence to the Student Code of Conduct

Students are expected to act in a professional and respectful manner to their fellow students, faculty, and staff. Students should become acquainted with and understand the responsibilities set forth in the Student Handbook, especially those in the sections on Policy and Regulations. Adherence to university regulations is expected and required for successful completion of the program of studies. Enforcement within the classroom of policies regarding classroom behavior is the responsibility of the faculty member. All other discipline problems are to be referred to the Dean of Students.

16 Inclusive Classroom

This classroom is a place where you will be treated with respect; we welcome individuals of all ages, backgrounds, beliefs, ethnicities, gender, gender identities and expressions, sexual orientation, and other visible and non-visible differences. All members of this class are expected to contribute to a respectful, welcoming, and inclusive environment to allow all among us to learn and flourish.

17 Students with Disabilities

It is the policy of the university to make reasonable academic accommodations for qualified individuals with disabilities. If you are a person with a disability (non-physical) please register with the office of [Learning Support Services \(LSS\)](#) by emailing Learning.support.services@villanova.edu or by phoning 610-519-5176 as soon as possible. Registration is *required* in order to receive accommodations. In addition, please contact the instructor during office hours in order to make the appropriate arrangements.

The [Office of Disability Services \(ODS\)](#) collaborates with students, faculty, staff, and community members to create diverse learning environments that are usable, equitable, inclusive and sustainable. The ODS provides Villanova University students with physical the necessary support to successfully complete their education and participate in activities available to all students. If you have a diagnosed disability and plan to utilize academic accommodations, please contact and register with Gregory Hannah, advisor to students with disabilities at 610-519-3209 or visit the office on the second floor of the Connelly Center.

18 Tutoring Services

Villanova's tutoring services include [The Writing Center](#), [The Learner's Studio](#), and [The Center for Speaking and Presentation](#). These services are offered free of charge to students. Drop in as-needed or book a regular weekly session to supercharge your academic success. Sessions can be 30 or 60 minutes in length.

Register for an account and book sessions in advance at villanova.mywconline.com. If you don't see your class listed, request a tutor for a missing subject at: tutorrequest.villanova.edu For more information, contact Juliana Struder at juliana.studer@villanova.edu or at 610-519-5862.

19 Online Expectations

Some or all sessions of this class may be recorded for educational purposes and for later playback. In order to foster a professional environment, please wear appropriate clothes, refrain from eating, mute your microphone when you are not talking so as to eliminate background noise, and select an appropriate setting free of distractions. You may turn off your webcam for privacy reasons unless explicitly instructed not to do so by the instructor (such as during the conduct of online examinations).

20 Electronics Policy

The use of electronic devices, such as phones, laptops, tablets, calculators, etc., during class is generally allowed, unless their use causes a disturbance to others. During examinations, the use of any electronic device is prohibited, unless it is expressly authorized by the instructor.

Students are prohibited from making any audio or visual recordings (including taking photographs) of lectures, discussions, or other classroom activities, unless a student (1) has written permission in advance from the instructor, or (2) is permitted to record under terms and conditions as approved by the University's Office of Disability Services or Learning Support Services. Students who have received approval to record classes as an academic accommodation must provide supporting documentation from the Office of Disability Services or Learning Support Services in advance of any recording. Students may use authorized recordings only for the purposes of individual study in the course, and may not disseminate or share them with a wider audience without explicit permission.

21 Copyright Policy

The materials used in Villanova University courses ("Course Materials") generally represent the intellectual property of course instructors, third parties and/or the university which may not be disseminated or reproduced in any form for public distribution (e.g., sale, exchange, etc.) without the written permission of the course instructor. Course materials include all written or electronic documents and materials, including syllabi, current and past examination questions/answers, and presentations such as lectures, videos, slides, etc., provided by a course instructor. Course materials may only be used by students enrolled in the course for academic (course-related) purposes.

Published course readings (book chapters, articles, reports, etc.) available in "Blackboard" are copyrighted materials. These works are made available to students through licensed databases or fair use. They are protected by copyright law, and may not be further disseminated or reproduced in any form for distribution (e.g. uploading to websites, sale, exchange, etc.) without the permission of the copyright owner.

Follow these links for more information on [Intellectual Property](#), [Copyright](#), and [Computer Acceptable Use](#).

22 Professorial Duties

It is important to note that teaching is one of the many duties that professors perform as part of their job responsibilities. In addition to teaching, professors perform research, advise graduate

students, edit journals and review journal articles, serve on committees for the university and professional societies, travel to conferences to remain abreast of current developments and to present their results... to name just a few commitments.
